Professional Summary

Frontend Developer with 4 years of experience building scalable web and cross-platform applications using Angular and Vue.js. Strong focus on performance, accessibility, and clean architecture, with proven results including achieving a 100% Lighthouse accessibility score. Experienced in modern frontend tooling, automated testing, and collaborating with backend teams to deliver high-quality user experiences.

Experience:

July 2023 - present

Frontend Developer - Thinker

- Developed and optimized the user interface of a cross-platform POS application using Angular, Ionic, and Capacitor, ensuring consistent UX across web, Android, and iOS.
- Delivered a production-grade Angular application for the US automotive market, achieving a 100% Lighthouse accessibility score.
- Maintained and modernized a legacy AngularJS application, improving code quality and maintainability.
- Developed and optimized Vue.js features for an online ordering platform, improving performance and user experience.
- Integrated frontend applications with REST APIs, ensuring reliable and efficient data flow between client and server.

November 2022 - July 2023

Frontend Developer - EmbedSocial

- Built and maintained production features using Vue.js, improving platform stability and usability.
- Migrated legacy jQuery/Twig components into reusable Vue.js components, reducing technical debt and improving performance.
- Implemented unit tests using Jest and Vue Test Utils, increasing code reliability and reducing regressions.
- Collaborated with cross-functional teams to deliver features in an Agile environment.

August 2022 - November 2022

Frontend Developer Intern - EmbedSocial

- Learned Vue.js, Vue Test Utils, Jest and Pinia while developing frontend features
