PROFESSIONAL SUMMARY

Angular-focused Frontend Developer with 4 years of experience building scalable, high-performance web and cross-platform applications — including 3 years specializing in Angular. Delivered a production Angular application reaching a 100% Lighthouse accessibility score, and contributed across the full stack with .NET/C# feature work alongside the frontend. Strong on clean architecture, automated testing, and close collaboration with backend teams, with an early foundation in Vue.js.

EXPERIENCE

Frontend Developer (Angular) — Thinker

Jul 2023 – Present

- Built and optimized a cross-platform POS application in Angular, Ionic, and Capacitor, delivering consistent UX across web, Android, and iOS.
- Delivered a production-grade Angular application for the US automotive market, achieving a **100% Lighthouse accessibility score**.
- Contributed full-stack features using C#/.NET and Entity Framework, integrating Angular frontends with backend services and REST APIs for reliable, efficient data flow.
- Maintained and modernized a legacy AngularJS application, improving code quality and long-term maintainability.
- Also delivered Vue.js features for an online ordering platform, improving performance and user experience.

Frontend Developer — EmbedSocial

Nov 2022 – Jul 2023

- Built and maintained production features in Vue.js, improving platform stability and usability.
- Migrated legacy jQuery/Twig components into reusable Vue.js components, reducing technical debt and improving performance.
- Implemented unit tests with Jest and Vue Test Utils, increasing reliability and reducing regressions.
- Collaborated with cross-functional teams to ship features in an Agile environment.

Frontend Developer Intern — EmbedSocial

Aug 2022 – Nov 2022

- Built frontend features while learning Vue.js, Pinia, Jest, and Vue Test Utils.

TECHNICAL SKILLS

Core (Angular): TypeScript, JavaScript, Angular, RxJS, Ionic, Capacitor, HTML5, CSS3 (BEM), SCSS, Bootstrap

Backend & Full-Stack: C#, .NET, Entity Framework, REST APIs, SQL
